Crisis And Trauma: Developmental-ecological Intervention (Crisis Intervention)

Synopsis

This text introduces students to the fundamental concepts of crisis theory and practice and provides models for single-session intervention and ongoing crisis counseling. The authors present their theoretical framework and assessment and intervention models; then apply them to a variety of crises; such as sexual assault, domestic violence, substance abuse, and death. A special chapter--written by an expert in disaster crisis--uses a case example of the World Trade Center attack to illustrate protocol in this type of situation. Students learn to incorporate assessment into intervention--from the first interview through resolution--using the unique ABCDE model--Affective responses, Behavioral responses, Cognitive responses, Developmental assessment, Ecological assessment. Used to evaluate crisis reactions, this model increases the range of the classic ABC, to incorporate a developmental-ecological perspective which draws on both developmental and systems theory.

Book Information

Series: Crisis Intervention

Paperback: 544 pages

Publisher: Psychology Press; 1 edition (June 22, 2004)

Language: English

ISBN-10: 0618373713

ISBN-13: 978-0618373710

Product Dimensions: 6.2 x 1.3 x 9.2 inches

Helping the Helpers: Avoiding Burnout, Compassion Fatigue, and Secondary Traumatic Stress Burnout Case Example: Marcus Secondary Traumatic Stress and Vicarious Traumatization On a Positive Note: Compassion Satisfaction and Work Fulfillment A Caregiver's Reflection on September 11, by Grace Telesco

What a boring, repetitive read. The information is spot on and informative but it feels like you're reading the same chapter over and over again by the time you reach chapter 5. The font is too small and the language redundant. It starts out as a book that seems like it should contain lots of amazing information but just doesn't deliver.

It's good and without complain

Overall honest & fairly new. It does the job!

Great book and good condition I am happy with my overall order and will be looking for other books that I need

You should be ashamed of selling a book in that condition. It was torn and pages were partially torn out. It was over priced and I am not pleased with the overall quality.

This book is user friendly and provides a great overview of counseling client's in crisis. It provides sufficient theoretical background and support for using the developmental-ecological approach. The authors provide descriptions of specific, concrete skills to use when working with clients who are in crisis. It includes chapters detailing guidelines and information for working with clients in specific kinds of crisis such as sexual assault, death and terminal illness, and disaster trauma.

not the book I expected other classmates had a thicker seemed to be newer version.
