I'm in MediNail Learning Ctr taking the online courses to advance my knowledge as a Nail Technician in the state of NC. This book says it all...better be careful where you put your feet and what salon you use...you could die simply by getting a pedicure!

I am a nail tech with many concerns about the lack of sanitation and safety in the nail industry. This book was my text book in the Advanced Nail Tech course offered by Medinails Learning Center, and taught by the author Dr. Spalding. The book is clear and concise, not heady. It is easy to understand, informative and thorough. The title has apparently changed to The Science of

Pedicures. I like the first title better, catchy and gets to the point about health and safety. Every nail tech should read this book.

Could have covered the same ground within half the number of pages. Not laid out the best but still worthwhile reading AND doing something about the problems raised.

This book was purchased for a Nails Instructor. It is strongly recommended that this book be read by Nails Instructors and information should be incorporated into the curriculum. Also, workers in the Nails industry and anyone who visits Nail Salons would benefit by reading this book. Very informative and eye-opening.

Very interesting.

written well & thier was alot of important information."a wealth of information

This should be required reading for every nail technician prior to licensing.
