Olds' Maternal-Newborn Nursing & Women's Health Across The Lifespan (8th Edition)

Synopsis

Nurses working with childbearing families face a variety new challenges, including shortened lengths of hospital stay, the trend toward greater use of community-based and home care, and downsizing and mergers of health-care systems. This book is not only important reading for maternity nurses, but also can be used as an invaluable reference tool. The Eighth Edition of this popular book not only continues to emphasize the central role played by maternity nurses working with today's childbearing families, but also includes a global perspective, covering culture as a factor in relating to the woman's childbirth experience. It also includes a comprehensive, accessible segment on women's health issues.

Book Information

Hardcover: 1280 pages

Publisher: Pearson; 8 edition (May 3, 2007)

Language: English

ISBN-10: 0132208733

Customer Reviews

This portable handbook provides students with a succinct, quick-reference guide for use in the clinical setting. Content is organized by each stage of the childbirth process and includes normal and at risk information. Procedures, tables, photos, and illustrations are integrated throughout. Nursing students and professionals. --This text refers to an out of print or unavailable edition of this title.

Michele Davidson [COPY TO COME for Michele Davidson] Marcia L. London Marcia L. London has been able to combine her two greatest passions by being both a nurse caring for children and families and a teacher for almost 35 years. She received her B.S.N. and school nurse certificate from Plattsburgh State University in Plattsburgh, New York. After graduation, she began

her nursing career as a pediatric nurse at St. Lukeâ™s Hospital in New York City then moved to Pittsburgh, where she began her teaching career. Mrs. London accepted a faculty position at Pittsburghâ™s Childrenâ™s Hospital Affiliate Program and received her M.S.N. in pediatrics as a clinical nurse specialist from the University of Pittsburgh. Mrs. London began teaching at Beth-El School of Nursing and Health Science in 1974 after opening the first intensive care nursery at Memorial Hospital of Colorado Springs. She has served in many administrative and faculty positions at Beth-El, including coordinator for nursing care of children for 32 years. Mrs. London maintains her clinical skills working in an urgent care and after-hours clinic and doing undergraduate pediatric clinical supervision. She obtained her postmasterâ™s neonatal nurse practitioner certificate in 1983 and subsequently developed the neonatal nurse practitioner (NNP) program and the masterâ™s NNP program at Beth-El. She is active nationally in neonatal nursing and was involved in the development of the Neonatal Nurse Practitioner Educational Program Guidelines. She has contributed 5 chapters to various neonatal nursing texts. Mrs. London is active in nurse practitioner education in general. She was involved in the revision of the Core Competency for Nurse Practitioners and Curriculum Guidelines for Nurse Practitioner Education, as a member of the Education Committee of the National Organization of Nurse Practitioner Faculties and participated as part of the Core Competency Validation Expert Panel. Mrs. London has also pursued her interest in college student learning by taking doctoral classes in higher education administration and adult learning at the University of Denver in Colorado. She feels fortunate to be involved in the education of her future colleagues. Her teaching philosophy is that, with support, students can achieve more than they may initially believe they are capable of achieving. Mrs. London and her husband have two sons and one dog (Reilly, daughter by proxy). Her two sons, Craig and Matthew, are involved in computer informatics, and media arts and animation and are more than willing to give Mom helpful hints. Â Patricia A. Wieland Ladewig Patricia A. Wieland Ladewig received her B.S. from the College of Saint Teresa in Winona, Minnesota. After graduation, she worked as a pediatric nurse before joining the U.S. Air Force. After completing her tour of duty, Dr. Ladewig relocated at Florida, where she accepted a faculty position at Florida State University. There she embraced teaching as her calling. Over the years, she taught at several schools of nursing while earning her M.S.N. in maternal-newborn nursing from Catholic University of America in Washington, D.C., and her Ph.D. in higher education administration from the University of Denver in Colorado. In addition, she became a womenâ™s health nurse practitioner and maintained a part-time clinical practice. In 1988 Dr. Ladewig became the first director of the nursing program at Regis College in Denver and, in 1991, when the college became Regis University, she became dean of the Rueckert-Hartman

School for Health Professions. Under her guidance, the Department of Nursing has added a graduate program and the SchoolÂ has added three departments: the Department of Physical Therapy, the Department of Health Services Administration and Management, and the Department of Health Care Ethics. Dr. Ladewig feels that teaching others to be excellent, caring nurses gives her the best of all worlds because it keeps her in touch with the profession she loves and enables her to help shape the future of the nursing profession. When not at work or writing textbooks, Pat and her husband, Tim, enjoy skiing, baseball games, and traveling. However their greatest pleasure comes from their family: son Ryan, his wife, Amanda, and grandson Reed; and son, Erik, his wife Kedri, and granddaughter Emma.

This text is well written and presented. It is clear, organized, and generally easy to read without boring me to tears. I bought the 8th ed. even though my course assigned the 9th, because this version is so cheap it's practically free. I've looked at the 9th ed. that all my classmates bought (and paid \$90+) and the two are so similar that the new version is most certainly not worth the extra expense. Just make sure you check the subjects on the chapters in your syllabus, as some do not match up with the 9th ed. I highly recommend you buy this version in place of the new one!

This book was required for my nursing school - BSN program. I feel the selection of books my program chose were all very informative, to the point and we used the books for the classes that required them. During nursing school most people do not know where their career will take them, there are so many options the RN has available, so building a strong foundation is essential to success in the field. Nursing books are not written to be entertaining they are for educational purpose only. This book definitely offered education. After you graduate school and chose a path then find the best reference book you can find and carry it with you until the day you retire. I always recommend the additional study guide to a book if one is available.

I had to buy this for a nursing class, but even though it covers the field I want to work in, I will NOT be keeping this as a reference book. The organization of information in this book is confusing and illogical. One has to scan four chapters to get information on a single pregnancy complication. It's unfortunate that this was the textbook of choice for my class. I would have rathered spend my money and time getting into a book I could reference for years to come.

Almost every topic is discussed in two or more separate places. Sometimes the information is

redundant, sometimes you have to combine the information from different parts of the book to define a term, for example, subinvolution is introduced on page 1042, then discussed more on page 1162. Same information is given about breastfeeding in two separate places. The contents are so disorganized that this textbook is my most hated text book.

This book is an excellent source of information when it comes to OB. I am very pleased with how the content is easy to understand. The pictures are a great source of information. This by far is the best book a student can purchase for nursing school in your OB rotation. This book went right along on how the teacher explained it to us. Thanks to OLDs for coming up with such a great OB book. Keep up the good work. Students need something that is easy to relate to and understand. This is the book you would want to purchase. Thanks again, Rosie Holmes

A book necessary to begin study for the certification for registered nurses! It has been such a great resource for me.

I really loved this book. It was just as the seller described in the description as well. This was a life saving book during my OB rotation. I really liked the cards that you could take out of the book and put into your pocket during clinical very nice feature.

Excellent product.
