Customer Reviews

It takes quite something to master the art of acrylic painting. Ruth Collins seems to have not only mastered it but has come up with easy tips and tricks to help others. I liked the tip on how to create rosettes in a raised 3D look. What'sÂ™s amazing is that you only have to use pastry tools and there is no need of trips to expensive art supply stores.

This is so fun! I would have never thought to make cake decorating into a painting. This has easy to follow instructions and great tips.

For any artist, this is a great idea, easy step by step guide to make rosettes.....If you want to be original in your art then go for it. Super book.

I took Ruth's Udemmy course "How To Paint a 3D Sculptural Rose" and was won over by how warm and inviting she was as she explained all of the steps one would take to create a 3D sculptural rose and, therefore, how to get started with your own sculptural painting. This book is a perfect follow-up to that course but also stands on its own as an even more detailed exploration of this exciting painting technique. The text is clear and easy to follow and the pictures really help the reader understand the steps and what to expect. Ruth also gives the reader lots of ideas for what other things are possible, beyond impasto rosettes. So, have fun with the techniques carefully and lovingly outlined in Ruth's guide (or through her course). I should point out that I am not a painter per se, I used to do some painting when I was younger but haven't touched a canvas or paints in quite some time. Ruth has definitely inspired me to change that as soon as I can find the time! :-)

Wonderful book, i did not know how hard making Impasto Rosettes would be but it was easy once i read this book. Short but concise. I would recommend.

Having been familiar with all the cake decoarating tools Ms. Collis talks about made it very easy for me to follow her directions and instructions really well. This method of painting is a wide open field, very imaginative and innovative. One could go wild with the many uses of the left over paint leathers if there are any. Being dimensional people we are never satisfied with flat surfaces. Ms Collis gives us an alternative way to create demension and use our God given talent to create beyond the norm.
