Grade Level: Preschool and up

Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational resources to support every curriculum.

I am a stay-at-home mom and I purchased this book for my 3 year old. What I enjoy most about this book is that it is simple to follow as an adult and gives clear and strait to the point directions for each activity. It contains many patterning exercises and differentiating between same and different, which makes it very useful since these are pre-kindergarten exercises. My daughter really looks forward to working in this book each day and another good aspect of it is that it does not require any writing; all she has to do is point. This book is set up very nicely in the beginning it is easy activity's and it slowly progresses to more difficult activities.

Perfect price for the ammount of material perfect for my 3 year old very fast delivery.... ordered

these with a few others they all came the same day.

This book is a little over 36 pages, but the concepts introduced are very engaging and challenging. It contains many patterning exercises and differentiating between same and different. This is a perfect Pre-Kindergarten Checklist book.

My 3 year old loves school and loved this book. She completed the entire thing in one sitting while on a long flight. Kept her engaged the entire time and not too difficult for her.

Love school zone! My daughter zooms through a book in a sitting because she loves the work sheets so much. She would easily sit an hour to just do work sheets, awesome!

My 4 year old is learning his numbers and letters. He loves this workbook. It is attractive and keeps his interest. It is a good tool. I have ordered other books from Preschool Basics.

Book is great.....however it doesn't match the cover book pictured, which means it doesn't match with the books I already have and want to use for my preschool. Assuming it's either an older or newer publication of the Preschool Basics I purchased earlier from a bookstore.

I really like this book for prepping my 2.5 year old son for preschool in the fall. Some of the concepts are over his head, but he already knows colors, numbers, shapes, letters, etc so I needed something that would challenge him. He regularly pulls it out and asks to go through it with me.
