Basic Clinical Lab Competencies For Respiratory Care

Synopsis

This book combines the theoretical knowledge and psychomotor skills required to perform the required to practice the art and science of respiratory care. Other books only present the psychomotor aspects of a skill or procedure (monkey see monkey do). This is the only text that integrates the theory knowledge and the practical skills in one concise manual. By combining both aspects of procedural performance, indications, contraindications, assessment and outcomes may be more thoroughly emphasized. The inclusion of the American Association for Respiratory Care Clinical Practice Guidelines lends credibility to this approach. The clinical practice guidelines emphasize the importance of assessment of need, contraindications, hazards/complications, monitoring and outcomes assessment. Simply providing a "cook book" approach to a skill or procedure negates the importance of the theory required to perform adequate assessment and document outcomes of a given therapeutic intervention.

Book Information

Series: Basic Clinical Lab Competencies for Respiratory Care

Paperback: 720 pages

Publisher: Cengage Learning; 4 edition (October 17, 2002)

Language: English

ISBN-10: 0766825329

ISBN-13: 978-0766825321

Product Dimensions: 10.2 x 8.8 x 1.1 inches

Shipping Weight: 3.2 pounds

Average Customer Review: 4.6 out of 5 stars 18 customer reviews

Customer Reviews

This textbook explains theory and operation of respirator equipment routinely used in the hospital setting, with section on patient assessment therapeutics, emergence management, and ventilation. Topics include pulmonary testing, oxygen administration, intravenous lines and new born mechanical ventilation. The fourth edition adds chapters on radiological assessment, bronchial hygiene therapy, chest tubes, and wave form analysis. - SciTech Book News March 2003

Gary White is the program director of the Respiratory Care Program at Spokane Community College, where he has been teaching since 1992. He previously held the rank of Assistant Professor of Respiratory Care at Weber State University from 1982 to 1992. He holds a master's degree from Weber State University in Education, a bachelor's degree in Biology from the University of Puget Sound, and an associate's degree in Respiratory Therapy from Highline Community College. Gary's avocation is writing. He has authored three text books in respiratory care and is currently working on a manuscript for his fourth title.

ok

This is an older addition but I love it because I didn't want to buy the new one in print. I can take this with me to lab and not worry about my e reader.

It took 2 days to arrive to my home since I made the order. The item was in perfect conditions as they described. Thank you :)

Fast shipping. Great book.

i love this book, its straight to the point and i get the full concept i highly recommend for students.

Pages were missing from the book, were not critical but had to have another classmate make copies for me. Was a hassle.

Excellent buy. Brand new book sold for \$0.76. What more do I need to say??? Came at a reasonable time. Couldnt have got a better deal anywhere else!!!!

This is the bare bones, no fluff, respiratory equipment guide. Follows clinical check-offs and tells you exactly what you NEED to know. Well worth the envestment for any student or RT.
