ISBN-13: 978-0030556678

Product Dimensions: 1.2 x 8.8 x 11 inches

Shipping Weight: 3.4 pounds

Average Customer Review: 4.6 out of 5 stars 11 customer reviews

Best Sellers Rank: #205,083 in Books (See Top 100 in Books) #42 in Books > Teens > Education & Reference > Science & Technology > Earth Science #56172 in Books > Textbooks

## **Customer Reviews**

Earth Science

Thank you. This book came in very good condition. Arrived on time. I home school my son and it's very often I will order books that say they are a certain date of copywriter and they aren't. Which means my teachers edition isn't the same wording as my students edition. It would be worthless. But this was just as described. For all the homeschool mom's out there that make their own curriculum, check the copywrite dates!! I would recommend this company thank you.

This science book purchase was to increase the number of copies that already exist on our campus. The books were delivered in great condition and sooner than expected. Thank you very much.

This book portrays excellent rationale and images that convey or far-fetch the basic aspect of earth science. It invites any student to participate in the learning process. I actually dropped the college book and picked this up because it is excellent.

Great book for my son's Science Curriculum!

Great 5th/6th grade level text to introduce earth science/geology topics. Nice diagrams and

illustrations. Includes simple experiments. Touches on minerals, energy resources, plate tectonics, earthquakes, volcanoes, erosion, oceanography, and weather and climate. Many topics are re-introduced in college level texts. Great jumping off point for homeschoolers looking for a book to guide them through earth science studies.

Like the information and in-depth photos this books shares with my 6th grader. I would recommend this book for others homeschooling.

Exactly as described

Good condition. Everything great and good for homeschooling
