Grzimek's Student Animal Life Resource: Cumulative Index

Synopsis

Following in the footsteps of Gale's acclaimed "Grzimek's Animal Life Encyclopedia," 2nd Ed., "Grzimek's Student Animal Life Resource" offers broad, comprehensive coverage of the animal kingdom, ranging from the simple -- sponges and corals -- to the complex -- mammals. In this 20-volume set, animals are grouped by major classifications: sponges; corals; jellyfishes; segmented worms; crustaceans and mollusks; insects; fishes; amphibians; reptiles birds; and mammals. In addition, this student edition includes an overview with photos and illustrations, and is present in each volume of the set. The "Words to Know" section gives a pronunciation and definition within the text to scientific or other difficult terms and names. Also included in this version are the Species List by Biome and Species List by Geographic Range.

Customer Reviews

This two new student reference source is an offshoot of Gale's Grzimek's Animal Life Encyclopedia (2d. ed, Gale, 2002). Upcoming entries in the series are Corals, Jellyfishes, Sponges, and Other Simple Animals; Crustaceans, Mollusks, and Segmented Worms; Insects and Spiders; Fishes; Amphibians; and reptiles. In the set under review, each volume begins with a "Reader's Guide," a "Pronunciation Guide for Scientific Names," a "Words to Know" section, and a section on "Getting to Know Mammals." Each of the volumes concludes with a "Species List by Biome" as well as a "Species List by Geographic Range." Each volume also includes a comprehensive index. mammals

offers coverage of 141 families and 265 species. Entries are arranged by taxonomy. Order entries offer an overview of a group of families, and family entries provide an overview of a particular family. Each entry includes sections on physical characteristics, geographic range, habitat, diet, behavior and reproduction, animals and people, and conservation status. The family entries are followed by one or more species accounts, which include the same information, in addition to a map indicating range and a photograph or illustration for each species. Conservation is emphasized, and the set makes use of the IUCN (International Union for Conservation of Nature and Natural Resources, now the World Conservation Union) Red List categories for each species. Each entry concludes with a list of books, periodicals, and Web sites (including a note of the date when they were last accessed) for further research. There are more than 500 colorful photographs, illustrations, and charts. Sidebars provide supplemental information. Layout is open and appealing, and the writing is clear and easily understood. The set would be a useful addition for middle-school, high-school, and public libraries. Maren Ostergard Copyright © American Library Association.
