The Akashic Experience: Science And The Cosmic Memory Field

Synopsis

Firsthand testimonies by 20 leaders in culture and science of their interactions with the Akashic field

- Provides important evidence for the authenticity of nonmaterial contact that human beings have with each other and with the cosmos
- Demonstrates that the increasing frequency and intensity of these experiences is evidence of a widespread spiritual resurgence
- Includes contributions by Alex Grey, Stanislav Grof, Stanley Krippner, Swami Kriyananda, Edgar Mitchell, and others

Knowing or feeling that we are all connected to each other and to the cosmos by more than our eyes and ears is not a new notion but one as old as humanity. Traditional indigenous societies were fully aware of nonmaterial connections and incorporated them into their daily life. The modern world, however, continues to dismiss and even deny these intangible links--taking as real only that which is physically manifest or proved scientifically. • Consequently our mainstream culture is spiritually impoverished, and the world we live in has become disenchanted. In *The Akashic Experience*, 20 leading authorities in fields such as psychiatry, physics, philosophy, anthropology, natural healing, near death experience, and spirituality offer firsthand accounts of interactions with a cosmic memory field that can transmit information to people without having to go through the senses. Their experiences with the Akashic field are now validated and supported by evidence from cutting-edge sciences that shows that there is a cosmic memory field that contains all information--past, present, and future. The increasing frequency and intensity of these Akashic experiences are an integral part of a large-scale spiritual resurgence and evolution of human consciousness that is under way today.

"The 20 accounts make fascinating reading, testifying to the fact that we are subtly yet effectively linked with each other, with nature, and with the cosmos. It inspires solidarity, love, empathy, and a sense of responsibility for each other and the environment. These are ineluctable elements of the mind-set we need to pull out of the global crisis that threatens our world and to create peace and sustainability on this perilously ravaged planet." (SirReadaLot.org, March 2009)" . . . truly ground breaking in its attempt to give a measure of organization to the known and some sense of identity to the unknown. The human language, as it presently exists, simply does not have the eloquence to deal with the 'thought downloads' that we are dealing with in this sphere of experience." (Zareen Khan, New Age Journal, May 2009)"Laszlo sees hope in the expanding horizons of scientific research and adds a note on his own experience of the infinite Akasha." (Nexus New Times Magazine, Vol. 16, No. 4, June-July, 2009)"Laszlo has really delivered with this collection of varied experiences of the Akashic Field. It is reassuring to know that there are a lot of people out there willing to open their minds to new methods of thinking and perception, guiding us along the uncertain path we now walk, on the one side faith in the unknown, the uncertain; on the other, solid scientific evidence. Up ahead the two shall meet and become one, and this reviewer hopes humanity one day comes to bathe in the shining light." (Chard Currie, New Dawn, No. 116, Sep/Oct 2009)"Laszlo provides thought-provoking material as he continues to explore the nature of the universe and the field of awareness that connects us all." (Alice R. Berntson, New Connexion, Sep/Oct 2009)" . . . Laszlo remains an intriguing and inspiring ambassador from the domain of Akashic adventure." (The Scientific & Medical Network, UK, December 2010)"The Akashic Experience is a collection of essays by twenty noted cultural and scientific leaders, each describing their experiences with what the book terms Akashic Field - a cosmic memory field that contains all information, past, present and future. . . The authors note the increasing frequency and intensity with which experiences with the Akashic Field are being reported, and which are forming part of the large-scale spiritual resurgence and evolution in human consciousness taking place today." (The Beacon, July 2011)

SCIENCE / NEW THOUGHT Knowing or feeling that we are all connected to each other and to the cosmos by more than our eyes and ears is not a new notion but one as old as humanity. ERVIN LASZLO, a leading systems theorist who was twice nominated for the Nobel Peace Prize, is editor of the international periodical World Futures: The Journal of General Evolution and chancellor-designate of the newly formed GlobalShift University. He is the founder and president of the international think tanks the Club of Budapest and the General Evolution Research Group and the author of 83 books, translated into 23 languages. He lives in Italy.

I enjoyed reading the book as it's concept is one that does make one think, but it's not an easy read. I read this book over a year BEFORE I read 'The Law Of Attraction'. Thus, comparing the two, I guess I would say that Akashic's focus is on the premise that we have lived many lives, and introduces a variety of 'examples' through individual reports of their own experiences. And, while the book written on the subject of 'The Law of Attraction' (as defined through the channeled Abraham), does agree with the premise that we have lived many lives, 'Abraham' and the Authors of Law of Attraction focus specifically on THIS CURRENT LIFE and how to get the most out of 'this space and time' as unique individuals who have chosen to be a part of this current existence, (along with our 'Inner Being' who represents the culmination of all of those past lives and experiences, to guide us through life in joy and fulfillment in our NOW experience.)

I keep this book on my nightstand for quick reference to short true stories that inspire and interest me to learn more. The author does not disappoint when he writes (multiple books) and this book stays in line with his credentials of the highest order. This is a treasure of a book to learn and grow about a subject matter that is often referred to as out of the mainstream of thinking. The author makes a good mark in all of his books with his scope of vision. This book does not disappoint and worth the read. I knew about the book and researched for the title. It was within days I had my book delivered and began to read. This is the nice thing about ... they deliver as quickly as you wish to

have your product. If they are delayed, they notify you as such. How nice is that in today's fast moving world that often doesn't care about the customer. continues to prove itself worthy of all the compliments they receive.

VERY GOOD. Gives some very good examples of others' experiences. Probably not for the novice. Am also reading "Spiritual Pilgrims: Carl Jung and Teresa of Avila" which goes deeper into the spiritual/transformation of Teresa and her actual OBEs.

Great book!!

I love Ervin Laszlo's books, and this one is a fascinating read. Recommended!

insightful

Great book.

wonderful insights...easy reading...revealing things that I never understood. A book to start one on a greater search of the truth.
