Customer Reviews

BY FAR THE BEST STUDY TOOL YET!! These were perfect, and covered almost exactly what was in my text for A&P. I carried these with me everywhere I went, and many of my fellow students ordered some as well. If you are taking A&P these flashcards are a must! Some of the cards even had explanations for some of my essay questions!!

These review cards are well organized and thorough. Even though the book required by my A&P class is different, these cards are in the very same order as the chapters of my textbook.

It's a great study has looks of details and shows you different views of the structures. The one thing I do not like is that they will slightly change the name of the same structure on 2 cards. For example on a card for the skull they put the structure is the mental canal of mandible. On the next card which is a side view of the skull they say it's the mental foramen of mandible. It's not a big deal but it is on several cards.

these are very detailed, nicely organized and very helpful. you can take out what you need and don't have to carry around all of them.

Great study cards for a class that is designed for self-study.

i can take just the section I'm studying and review while I'm waiting. They fit nicely in my purse or coat pocket.

Perfect for my daughter studying for anatomy class. It is very detailed and a little too advanced in some of the studies. Overall it is a good piece for added help with studying.

Filled with information and test questions. Great resource!
