Propagating Your Plants

Synopsis

Plants propagate themselves naturally in the wild, using a variety of amazing techniques, and gardeners can learn from nature by copying these methods in their own backyards. This book explains how to grow plants from seed, how to take cuttings from established plants, dividing plants into sections, layering shoots, and grafting the top of one plant to the bottom of the another. All the techniques are explained with step-by-step instructions.

Book Information

Paperback: 128 pages

Publisher: Southwater (October 16, 2012)

Language: English

ISBN-10: 1780191456

ISBN-13: 978-1780191454

Customer Reviews

Richard Rosenfeld began his career as a publisher, and then became a freelance garden journalist. He was voted Garden Writer of the year in 1993 and has written many gardening books, including A Garden for All Seasons (Southwater) and Tricks With Trees (Pavilion) with Ivan Hicks. He has been a regular contributor to the Sunday Times Magazine, the Sunday Telegraph, the Sunday Express and the Daily Mail, and has designed gardens in Italy, the USA and England.

Loads of information in a language that even I can understand.

Book has been a huge help. It is very easy to understand and gives us a very practical approach to the problems we encounter. One of the very best books I have bought.
