This book is the real thing. Mr. Lyne has an invention to get us off of oil and it will never see the light of day thanks to the crooks that run the patent office. They are bought and payed for like everything here in America. The Rockefellers money and monopoly on the American people will continue to rule. Wake up to reality people ..... We have had electro-magnetic free energy since 1900 when Tesla tried to give the world his inventions and the Morgans and Rockefellers hid his inventions from view. UFO's or flying saucer electro - magnetic powered flying machines have been around since WW2 and maybe before that. They are built right here on earth by human beings and aliens didn't have to show us how to build them. This book is a must read for every human being on earth.

Can't agree with some of his material but a lot of info is good and revealing. I'm inclined to believe that there are more actual ETs and ET craft around our presence than what Mr Lyne does.

Needed to study some of it as in a text book. Still retain an open mind - convinced me on some things but not so on others.

Brilliant. Lyne has a quirky style, but his experience in the field makes his work 'must-read' material.

Great book. Buy an extra copy of this, and "Occult Ether Physics" to donate to your local library.

Anti-gravity the deep dark secret the bell keeps so no one ever discovers the truth about the flying saucers of area 51.[...]

This product is fine reading. This was recommended by a friend.. Delivered quite fast. Recommend you readfor yourself and draw your own conclusions.

The author, Mr. William Lyne by reviewing the work the work of Tesla, his own experiences with Tesla technology, undercover governmental operations and UFOs arrives at the conclusion, that the United in States cooperation with the nazis developed working Tesla aircraft powered by etheric force which are reason for many UFO sightings. He argues that this technology if released to the world would free people from the international oligopolies domination and cause carbon based fuel to become obsolete. The only thing that the Michaelson Morley established, was ether did not seem to affect the speed of light. I have questions , about several issues, however, if aliens do not exist and Tesla was completely right why was Tesla claim to be in contact with aliens and imply many of his inventions may have been alien inspired. There is no doubt seized Tesla's papers and did not release all they contained or tha Morgan and other large industrialist acted to effectively suppress, most of Tesla's later work. The government uses white (true), Grey (partially true, and partially false) and black (false) propaganda so gaining information from government agent statements greatly resembles fortune-telling through tea leaves. The book gives a grat deal to think about
