Customer Reviews

Mark S. Wolff is Professor and Chair of the Department of Cariology and Comprehensive Care at the NY University College of Dentistry. Dr. Wolff holds a DDS degree, a PhD in Oral Biology and Pathology, and a general practice residency certificate, all from Stony Brook University. He also completed an externship in periodontics at the Veterans Administration Medical Center in Northport, New York. Prior to joining NYU, Dr. Wolff implemented major educational and patient care innovations during 24 years as a faculty member and administrator at Stony Brook, including a first-year operative dentistry curriculum, a senior general practice training program, and a joint PhD/postdoctoral certificate program combining clinical and didactic training in general dentistry and diagnostic science. Dr. Wolff's appointments at Stony Brook included Professor of General Dentistry and of Oral Biology and Pathology; Director of Operative Dentistry; and Associate Dean for Information Technology and Special Projects.

This book is such a comprehensive textbook in the new cariology science, which gives dentists all is needed to improve the knowledge of the real reasons of tooth caries, assessment of caries risk factors by CAMBRA method, and implementing effective treatment to either stop a dental caries disease, or start remineralization process which gives teeth a permanent strength. To be honest, this book made a big positive effect on my restorative concepts and I am pretty sure that you will be more satisfy as a dentist by gaining much better results in your practice after applying easy, practical, and appropriate advice of this book, and you will be face less recurrent caries and lower failure cases in your dentistry practice. I would like to appreciate Professor. Douglas A. Young's efforts and hardworking on this concept since almost ten years ago by presenting all these valuable materials in preventive dentistry research environment.

You gotta read this book if you do any restorative job on tooth! I read this book and found a very practical, easy, and effective advice in it and would like to recommend it to all dentists.
