## Customer Reviews

Dad was suffering from Melanoma Cancer and I bought this book for Mom, who doesn't have internet access. After doctor appointments, she'd find herself with more and more questions she should have asked. This book answered so many of them. It also prepared her for what to expect as the cancer progressed. I'm very thankful I purchased this book for Mom. She felt prepared for the possibilities of what was to come. It also, in some ways, helped her stay strong knowing that certain side effects would occur. Melanoma is such a painful cancer and more awareness is definitely needed. This book should be read by anyone with small children and by those spending a lot of time outside in the elements. Maybe hearing about the side effects of melanoma will get us all to wear sunscreen each and every day. Anyway, if you are caring for someone with Melanoma or have a family member or friend who has it, BUY THIS BOOK and read it cover to cover.

Recipient seemed grateful for the book - thanks.

If you've been diagnosed with melanoma, this book is a must! The day I was told I had cancer, I was so frightened and confused. The doctor asked me if I had any questions, and I couldn't think of anything! The word "cancer!" just kept going through my mind. After reading this book, I was able to clear my head and not only ask questions, but ask the "right" questions. The only thing it didn't cover is the fact that it is sometimes difficult to diagnose melanoma. Sometimes the results are not black or white...there are also grey areas. But all in all, this book was extremely informative. Highly recommended.
