# The Divine Matrix: Bridging Time, Space, Miracles, And Belief

## Synopsis

Between 1993 and 2000, a series of groundbreaking experiments revealed dramatic evidence of a web of energy that connects everything in our lives and our world—the Divine Matrix. From the healing of our bodies, to the success of our careers, relationships, and the peace between nations, this new evidence demonstrates that we each hold the power to speak directly to the force that links all of creation. What would it mean to discover that the power to create joy, to heal suffering, and bring peace to nations lives inside of you? How differently would you live if you knew how to use this power each day of your life? Join Gregg Braden on this extraordinary journey bridging science, spirituality and miracles through the language of The Divine Matrix.

New York Times bestselling author Gregg Braden has been a featured guest at international conferences and media specials, exploring the role of spirituality in technology. A former senior computer systems designer (Martin Marietta Aerospace), computer geologist (Phillips Petroleum), and technical operations supervisor (Cisco Systems), Braden is now considered a leading authority on bridging the wisdom of our past with the science, technology, and peace of our future.

I have been interested in the concept of the law of attraction for many years and each author seems to have their own take on it, including Esther Hicks and John Assaraf. Hicks emphasizes the need to focus on a better life story and feel good about it. John Assaraf talks of the brain's ability to sift

through billions of data to find pathways to what you focus upon. Others, including the many people featured in "The Secret" note that it is important to feel as if you have already achieved what you want, and feel grateful for it even before it appears. Braden applies the science to the concept. He describes scientific findings of the ability of energy particles to be influenced by things not in proximity, and by thought, which is also a form of energy. He notes that ancient cultures already know about the power, and he looks at the actual texts of the writings that would later be included in the bible, noting parts that are eliminated through the various translations that describe the power of thought, which later became the power of prayer. I can feel his own sense of wonderment in what he uncovers, and enjoy his lectures on You-Tube. I cover him and other Law of Attraction writers on my site(...) and hope to review more of his works.

I loved this book. We are both the cause and effect of our own lives. We are the artist and the artwork. I learned a lot of amazing facts and philosophy from this book. As a practicing Buddhist, I found it brought many Buddhist principles to life in an easy to understand manner.

This book changed my life and my whole way of thinking. I have read it twice and will keep it on my bookshelf to read again. I love the way Greg explains science to validate ancient beliefs. I have bought this book for numerous friends and family.

Enjoyable, mind opening, and easy listening narrated by Gregg Braden

Not too bad. Writing is good but it's a bit too new-agey for me.

It's kind of "allovertheplace" lots of ideas and theories but nothing revolutionary that would be considered mind blowing for someone obsessed with physics and eagerly theories..great for a novice but those who eat sleep and breathe this type of stuff it's just too basic

This book was earth-shattering for me in many ways. I love books about quantum science, because it is on the cutting edge of science. I found that many chapters were dedicated to show how vigorously controlled experiments are revealing mystical quality at atomic level. The author does an excellent job in explaining the complexities of quantum science whilst showing how it applies to everyday life. This is a book that I will read time and time again.

In his book, 'The Divine Matrix', Gregg Braden writes about spiritual concepts regarding the connection we human beings have to each other, to all there is in the universe, and to our religious God of creation. Braden is personable, and his book is easy and understandable reading. It is uniquely interesting how he discusses notions of metaphysics and New Age thinking within the premises of what is being proven in the scientific world of Quantum Physics. Does this demean or reduce the stature of our God of the Bible? No, it instead makes the religious explanations of life and God so much larger and grander. They say that Quantum Physics will one day - scientifically prove God. ["Are the miracles that we see in the quantum world actually showing us our greatest possibilities rather than our scientific limits? There is a place where all things begin, the place that pure energy 'is'. In this quantum incubator for reality, everything is possible. In 1944, Max Planck, the father of quantum theory, shocked the world by saying that this 'matrix' is where the birth of stars, the DNA of life, and everything between originates... The Divine Matrix is real... It is the container for the universe, the bridge between our imagination and our reality, and the mirror in our world for what we create in our beliefs..."] - from the book. You will gain great insights about life, by reading this book - and, you will be able to discuss spiritual concepts with the science to back it up. It will enable you to see life, and yourself on a grander scale. ~ Stephen M. Kerner... Over 50 - A Single Man's Point Of View ~smkerner.wordpress.com
