This has to be the BEST chemistry textbook I have every used. I am a high school chemistry teacher and even though the information in this textbook is college level, it is a wonderful resource for the classroom. I teach low level all the way to AP/IB, the topics follow the curriculum perfectly, and the questions are great and prepares the students well for college. The way it is written is also very accessible and not written in an overly flowery and confusing way. It is awesome.

I really like the way this book explains everything. I also love all the sample problems and follow up problems! Practicing is the best way to get better at this subject and this book definitely gives you lots of it, along with explained solutions in the back. The online access also really helps me to stay on track and has a lot of great tools as well!
