Customer Reviews

Lots of repeats from his previous lead sheet book, but contains of new ones from Speaking of Now, Metheny Mehldau and Unity Band. Some work with Gary Burton and his trio's are here. Guitar is written one octave lower. I prefer format on Orchestrion lead sheet where more detail is given. Still wonderful collection from him and Lyle.

Well written and accurate as far as I, an amateur, can tell. Been a fan of Metheny's for decades and now so fun to play along with the songs and have the music there to guide me in passages where I couldn't transcribe the complete harmonic structures. Well worth the price and wonderful to have for any musician fan.

Great book - although I already had a large number of these tunes from the previously released

"Songbook". Also was hoping for more tunes from the CD "Speaking of Now", but still fantastic, nonetheless.

Great Book ..delivered to my door in a week as promised.

If you just want the lead sheets for Pat's tune then his would be good for you a lot of Metheny tunes for a good price. If you want to really study Pat then get his CD's and maybe one of the transcription books.
