# Guidelines For Fire Protection In Chemical, Petrochemical, And Hydrocarbon Processing Facilities

## Synopsis

While there are many resources available on fire protection and prevention in chemical petrochemical and petroleum plantsâ”this is the first book that pulls them all together in one comprehensive resource. This book provides the tools to develop, implement, and integrate a fire protection program into a company or facilityâ”s Risk Management System. This definitive volume is a must-read for loss prevention managers, site managers, project managers, engineers and EHS professionals. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

## Book Information

Hardcover: 480 pages

Publisher: Wiley-AIChE (August 15, 2003)

Language: English

ISBN-10: 0816908982

ISBN-13: 978-0816908981

Product Dimensions: 6.3 x 1.3 x 9.3 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 4 customer reviews

Best Sellers Rank: #279,317 in Books (See Top 100 in Books) #12 in Books > Engineering & Transportation > Engineering > Chemical > Plant Design #105 in Books > Engineering & Transportation > Engineering > Industrial, Manufacturing & Operational Systems > Health & Safety #105 in Books > Science & Math > Technology > Safety & Health

## Customer Reviews

The CENTER FOR CHEMICAL PROCESS SAFETY (CCPS), an industry technology alliance of the American Institute of Chemical Engineers (AIChE), has been a world leader in developing and disseminating information on process safety management and technology since 1985. CCPS has published over 80 books in its process safety guidelines and process safety concepts series. For more information, visit [www.ccpsonline.org](http://www.ccpsonline.org).

Excelente resource for those who are looking for guide for the develop of a fire protection strategy in the hydrocarbon processing facilities. From team management, risk assessment and analysis, fire protection fundamentals and finally inspection and testing. It is not a manual to design fire protection systems to the wide range of equipment involved, but it is a guide to understand the overall risks

involved in this industry. We will always require the final use of fire protection standards like NFPA.

Great book with lots of information industrial process facilities and how to approach them for providing fire protection.

Good

This book gives a clear and thorough insight into fire protection in Hydrocarbon processing facilities. It provides the information about performance based design approach which use engineering analysis of hazard, as well as requirements from related code. I recommend fire protection system designers, safety managers and risk surveyers working in hydrocarbon processing plants to read this book. Won K. Kim, , PE President of RMS
