Laryngeal Mask Anesthesia: Principles And Practice, 2e

Synopsis

This highly illustrated, comprehensive yet practical guide provides a complete, highly visual, step-by-step guide to using the Laryngeal Mask Airway. Containing over 250 top quality photographs accompanied by over 100 line diagrams, anatomy and technique are clarified for the reader in a uniquely visual way. In addition, the images are supplemented with comprehensive background information made highly accessible with textual summaries and key points. The text will also highlight common pitfalls and give guidance on how to avoid them. Boxed "case histories" will be integrated throughout the book to demonstrate the clinical scenarios and applications of the LMA. The second edition contains essential information and guidelines on basic and advanced uses of the LMA in anesthesiology, with emphasis on its role in management of the difficult airway and resuscitation. Laryngeal Mask Anesthesia: Principles and Practice, second edition, will continue to be an invaluable resource for all those who need to understand, implement and expand their use of this valuable and innovative airway management device. Provides an illustrative guide to both the common and the more difficult concepts being discussed using superb illustrations and a clear, easy to follow layout. Incorporates algorithms from the American Society of Anesthesiologist's guidelines. Covers a broad basis of understanding the LMA, including history, theoretical concepts and future directions for the device; complete anatomical, physiological and pathophysiological basis for use of the device; and a wide range of models and types. Illustrates clinical information on use of the LMA in pediatric and neonatal patients as well as in adults! Demonstrates clinical application of concepts through use of case histories. Highlights key points and references throughout. 17 new chapters, including: Co-existing disease, Specialized LMAs, Veterinary use, Skill acquisition, Other extraglottic airway devices, History, Equipment, Pathophysiology, Seal with respiratory and gastrointestinal tracts, Conduit to the respiratory and gastrointestinal tracts, Anesthesia - Pre-anesthesia phase, Anesthesia - Placement phase, Anesthesia - Maintenance phase, Anesthesia - Emergence phase, Resuscitation, Intensive care medicine, Problems

Book Information

Hardcover: 606 pages

Publisher: Saunders Ltd.; 2 edition (July 27, 2004)

Language: English

ISBN-10: 0702027006

ISBN-13: 978-0702027000

Product Dimensions: 11.2 x 9 x 1.5 inches

Shipping Weight: 5.2 pounds

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #5,014,200 in Books (See Top 100 in Books) #89 in Books > Medical Books > Medicine > Medical Procedure #240 in Books > Medical Books > Medicine > Reference > Instruments & Supplies #1987 in Books > Medical Books > Medicine > Surgery > Anesthesiology

Customer Reviews

"This second edition should be an essential resource for researchers in the field of extraglottic airway management. [I]t shows unambiguously what we know and what we do not about the extraglottic airways. Book of this kind should be used frequently to teach or to acquire skills, rather than just read at libraries...[B]usy clinicians will also find the well-summarized practical guidelines, concluding statements, meta-analysis and quick references useful." British Journal of Anesthesia , 2005

"The volume contains a complete revision of the 1st edition, with 22 chapters describing the mask's use in an exhaustive sampling of applications. The chapters are clearly organized, with a focus on application, troubleshooting, and technique. Case histories, key points, summaries, and exhaustive lists of references are included. New to the second edition are chapters on co-existing disease, specialized LMAs, veterinary use, skill acquisition, other extraglottic airway devices, pathophysiology, and intensive care medicine. The volume is well illustrated with color photos and drawings." SciTech Book News, December 2005

Joe R. Brimacombe, MB, ChB, FRCA, MD, Clinical Associate Professor, Department of Anaesthesia, Cairns Base Hospital, University of Queensland and James Cook University, Cairns, Australia

Amazing book written by SIR ARCHIE BRAIN AND JOSEPH BRIMACOMBE
