North American Wildland Plants, Third Edition: A Field Guide

Synopsis

North American Wildland Plants contains descriptions of the salient characteristics of the most important wildland plants of North America. This comprehensive reference assists individuals with limited botanical knowledge as well as natural resource professionals in identifying wildland plants. The two hundred species of wildland plants in this book were selected because of their abundance, desirability, or poisonous properties. Each illustration has been enhanced with labels pointing to key characteristics to facilitate the identification of unknown plants. Each plant description includes plant characteristics, an illustration of the plant with enlarged parts, and a general distribution map for North America. Each species description includes nomenclature; life span; origin; season of growth; inflorescence, flower or spikelet, or other reproductive parts; vegetative parts; and growth characteristics. Brief notes are included on habitat; livestock losses; and historic, food, and medicinal uses. This third edition contains additional refinements in the nomenclature, distribution, illustrations, and descriptions of plants. Â

Customer Reviews

â œWill prove useful to both individuals with limited botanical knowledge as well as natural resource professionals in identifying wildland plants.â •â "Natural Resources Journal Â (Natural Resources Journal 2016-09-12)â œThis standard in the field . . . just keeps getting better.â •â "Choice Â (Choice 2016-02-15)

James StubbendieckÂ is director emeritus of the Center for Great Plains Studies, College of Arts

and Sciences, and professor emeritus of grassland ecology in the Department of Agronomy and Horticulture, Institute of Agriculture and Natural Resources, at the University of Nebraskaâ€”Lincoln. Stephan L. Hatch is professor of grass taxonomy in the Department of Ecosystem Science and Management and director of the S. M. Tracy Herbarium at Texas A&M University. Neal M. Bryan is associate director of graduate student and postdoctoral development, Office of Graduate Studies at the University of Nebraskaâ€”Lincoln. Cheryl D. Dunn is research manager and herbarium curator in the Department of Agronomy and Horticulture, Institute of Agriculture and Natural Resources, at the University of Nebraskaâ€”Lincoln. Â

Excellent source of information for those trying to ID the plants they are coming across in America's prairie lands. Each species is given a full page of illustrations (no color photos) and a page explaining typical characteristics and even historic/medicinal uses. Although it lacks photos, the illustrations are of decent quality, and include numerous tips for identifying specific characteristics.
